ABOUT ME

Software Engineer with experience in designing and developing responsive web applications using modern frontend and backend technologies. Skilled in building scalable systems, integrating APIs, optimizing performance, and delivering user-focused solutions. Passionate about writing clean code and creating efficient web experiences.

SKILLS

Programming Languages: C++, Python, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, MongoDB

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOPs), Database Management Systems (DBMS), Operating Systems, Computer Networks

Tools & Technologies: Git, GitHub, VS Code

Soft Skills: Problem Solving, Debugging, Team Collaboration, Communication

EXPERIENCE

Independent Software Development |

2024 – Present

- Designed and developed scalable web applications using Node.js and Express.js, implementing backend functionality and modern development practices.
- Built authentication systems, REST APIs, optimized database schemas, and responsive application components to enhance performance and user experience.

AI & Python Development |

2024 – Present

- Developed NLP and machine learning-based applications using Python, Scikit-learn, and Streamlit for intelligent data processing workflows.
- Applied data preprocessing, text vectorization, and recommendation algorithms to build ATS-focused resume analysis systems and improve recommendation accuracy.

This keeps your experience consistent with the updated Node.js-focused skills while remaining ATS-friendly.

PROJECTS

Task Management System | Node.js, Express.js, MongoDB

- Developed a task management web application allowing users to create, update, and delete tasks efficiently.
- Implemented user authentication and REST APIs for secure task management and data handling.
- Designed responsive interfaces and integrated MongoDB for storing and managing user tasks.

E-Commerce Website | React.js, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce platform with product listing, search, and cart management functionalities.
- Developed REST APIs and integrated database operations for handling products and user data.
- Implemented responsive UI components to improve user experience across devices.

Weather Dashboard | Python, Streamlit, API Integration

- Developed a weather dashboard application using Python and Streamlit to display real-time weather information.
- Integrated external APIs to fetch weather data and present user-friendly insights.
- Implemented interactive features for searching weather conditions by location.

Chat Application | React.js, Node.js, Socket.io

- Built a real-time chat application enabling users to send and receive instant messages.
- Implemented user authentication and WebSocket communication for seamless interactions.
- Designed responsive interfaces to support communication across multiple devices.

AWARDS & CERTIFICATIONS

- Python for Data Science, AI & Development – IBM (Coursera):** Acquired hands-on experience in Python programming, data manipulation, object-oriented programming, APIs, and foundational AI concepts through practical assignments and labs.
- Data Structures & Algorithms:** Solved 200+ coding problems across LeetCode and coding platforms focusing on arrays, graphs, recursion, and dynamic programming.

EDUCATION

B.Tech Information Technology

JSS Academy Of Technical Education, Noida

2023-27
